

## Addendum #2

**Project:** Design and Construction Phase Services for the Replenish Big Bear Program  
**From:** David Lawrence, P.E., General Manager  
**Date:** November 13, 2023

### Questions and Answers

1. RFP, Section 2, Paragraph 4 (Pg 8): The RFP states that, “Proposers can assume no further ground survey and topographical mapping services are needed.” It is our understanding that this statement may refer to only the existing WWTP and pond areas.

Please confirm whether any existing survey exists for the following locations:

- a. Along the pipeline alignment between the WWTP and either of the proposed discharge points.

The Agency does not have any existing surveys along the pipeline alignment between the WWTP and either of the proposed discharge points.

- b. The area south of the existing WWTP property identified for proposed ground-mounted solar panels.

This area should not be included in proposals; it is likely to be conducted by the solar consultant/contractor.

### Clarifications and Additions

None this Addendum.

### Plan Revisions

None this Addendum.
